SUMMARY

Full Stack Developer with one year of experience in developing responsive and scalable web applications using Next.js, Django, PostgreSQL, Redis, and Docker. Expertise in writing clean code and solving complex problems. Committed to continuous learning and adapting to new technologies.

SKILLS

- React.js and Next.js
- Tailwind CSS and TypeScript
- Redux Toolkit
- Django and Django REST framework
- Python and PostgreSQL
- SQLite and Docker
- Git and GitHub
- Redis and Postman
- JWT authentication
- Agile development

EXPERIENCE

Junior Full Stack Developer

Cagtu Nepal | Kathmandu, Nepal | Nov 2024-Current

- Integrated Google Maps and Autocomplete API on the frontend for location-based services. • Developed and managed backend systems and databases for key projects such as Homaale (task/service platform) and Buzz API (e-commerce platform)
- Implemented international (PayPal, Stripe) and national (eSewa, Khalti) payment gateways in frontend using Next.js.
- Built and maintained full-stack web applications using Next.js and Django REST Framework • Used PostgreSQL, Redis, and Docker for efficient data handling and deployment.

Full Stack Intern

Cagtu Nepal | Kathmandu, Nepal | Aug 2024-Nov 2024

- Designed and developed responsive UI components using Next.js and Tailwind CSS.
- Collaborated with the development team to build features for real-world web applications using Next.js and Django.
- Contributed to the backend by fixing bugs, writing reusable endpoints, and learning Django and REST Framework basics.
- State Management with Redux Tool Kit
- Fetched and displayed dynamic data by consuming REST APIs with Axios.
- Gained hands-on experience with Git for version control and participated in daily standups and code reviews.

PROJECTS

Homaale (Task and Service Platform)

- Built a user-friendly service platform using Next.js and React (<https://homaale.com>)
- Connected Users with tasks and service providers through interactive features
- Used server-side rendering (SSR) in Next.js for performance and SEO improvements
- Integrated Redis caching for faster response times
- Used Celery for asynchronous tasks and background job processing
- Worked closely with the team in an agile environment

Cagtu CMS (Admin Dashboard)

- Built a custom admin dashboard to manage services, tasks, and User data • Used Django REST Framework for API development with role-based access
- Implemented CRUD operations with search and filter functionality
- Developed reusable UI components with Next.js and Tailwind CSS

Mitho Sweets (E-commerce Platform)

- Backend development for an Australia-based e-commerce platform offering multiple varieties of sweets to online customers
- Designed and implemented scalable REST APIs using Django and Django REST Framework to support products, categories, offers, payments, checkout, orders, customers, analytics, blogs, and support, customers and admin workflows
- Built business logic for order processing and role-based access control
- Optimized backend performance for scalability and reliability
- Integrated Redis caching and Celery task scheduling for faster performance and asynchronous job handling
- Wrote unit and integration tests using Pytest to ensure code quality and reliability

EDUCATION

Bachelor of Science: Computer Science and Information Technology

- Tribhuvan University | Kathmandu | Oct 2025
- Relevant Courses: Web Development, Database System, Networking, Software Engineering

+2 Science

- Panchayat Collage | Pathari, Morang | Mar 2022

INTERNSHIP CERTIFICATE

CAGTU Nepal, 2024

- Completed a hands-on internship focusing on Next.js, Django, and API integration (Google Maps, OAuth, etc.), gaining real-world experience in full-stack web development.
